SCHEDULE NO. 6
2019 TREATMENT PROJECT COST RECOVERY CHARGE

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

Applies to all new applicants for properties not currently served and within the Commission Service Area (as defined in the tariff) for the Utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity.

Conditions

The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods. This charge will be the monthly minimum bill for this class of service and will be in addition to other charges as provided in this tariff.

Purpose

This surcharge is to fund a treatment project that will remove iron, manganese, and arsenic in service zone "B". The project will also add disinfection to the entire water system. This is the result of water quality issues that require treatment to consistently meet Department of Health drinking water standards.

This surcharge is to expire June 20, 2038, or upon the recovery of 70% of the estimated cost of the project \$1,546,794 loan principle plus interest charges \$437,653 and state excise taxes \$29,766 whichever comes first. The estimates total amount to be recovered is \$2,014,214. The annual amount generated by the surcharge is \$100,613 or 14.2% of revenue. Surcharge may be paid (within 90 days of effective date) in a lump sum payment of \$937.52 and save interest costs. The lump sum payment is calculated using estimated construction costs. Upon completion of the project the lump sum payment may be adjusted up or down to reflect the final cost of the water treatment project.

Monthly Charge

SCHEDULE NO. 8
CROSS CONNECTION CONTROL

Availability

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable

To all customers served by the Utility for purposes of assessing the presence of cross connections and additional requirements applying to those customers that have cross connections.

Charges

Premises Inspection Charge \$25.00 per hour prorated for time spent.

Conditions

1. This schedule is established pursuant to the requirements adopted by the Washington State Department of Health in WAC 246-290-490, as it now exists or is hereafter amended or replaced. Copies of this regulation are available from the Washington State Department of Health or from the Utility.
2. All customers shall be surveyed as to the existence of cross connections pursuant to the definition of cross connections established by the Washington State Department of Health. A second survey shall be sent to those customers who fail to respond to the initial survey. If the customer fails to respond to the second survey, then the following non-response options may be necessary and the customer will be charged pursuant to the rate(s) set forth in the rate section above. For new customers, a survey will be required as part of the application prior to accepting the applicant as a customer.

Non-Response Options:

- a. Site Visit letter/appointment for on-site review of cross connection potential, followed by a Site Visit for determination of cross connection potential as defined in WAC 246-290-490. The customer will be assessed the charges set forth in the rate section above.
- b. Installation of Approved Backflow Prevention Assembly at customer's expense.
- c. Notice of disconnection of service per WAC 480-110-355 (3) (a).

SCHEDULE NO. 8
CROSS CONNECTION CONTROL (cont'd)

Conditions (cont'd)

3. An on-site inspection is required for every customer meeting any criteria of WAC 246-290-490 (4) (b) Table 9. The customer will be assessed the appropriate charges set forth above.

If a cross connection is detected or is reported by the customer, then the Utility will determine the appropriate remedy and notify the customer of the remedy, options, and dates for compliance. If an Approved Backflow Prevention Assembly is required, the Utility will determine the type of Approved Backflow Prevention Assembly that must be installed, and must provide the customer with a date by which the device must be installed. Installation will be the customer's responsibility and sole expense. The customer may choose to have the Approved Backflow Prevention Assembly installed through any contractor acceptable to the Utility. If the customer does not install the appropriate Approved Backflow Prevention Assembly within thirty days of notification, the Utility will give notice of disconnection pursuant to WAC's for discontinuing of service for water utilities. If the backflow assembly is not installed by the date for disconnection as specified in the notice, the Utility will disconnect customer's service as specified in **Rule 17** of this tariff.

If service is disconnected, the Utility will charge the customer its current Reconnection Visit Charge as specified in **Rule 6** of this tariff.

4. The Approved Backflow Prevention Assembly will be installed on a customer's side of the service connection.
5. The Utility shall ensure that personnel, including at least one person certified as a cross-connection control specialist, are provided to develop and implement the cross-connection control program.

SCHEDULE NO. 8
CROSS CONNECTION CONTROL (cont'd)

Conditions (cont'd)

6. If the customer has an Approved Backflow Prevention Assembly installed the assembly must be tested annually by a certified Backflow Assembly Tester (BAT) specialist. The Utility will maintain a list of certified BAT specialists that are acceptable to the Utility and the customer may choose from any such BAT specialist on the Utility's list. The customer will provide a copy of the acceptable annual report from the BAT specialist. If the annual report is not provided By June 1st, the Utility will provide a late notice followed by notice of disconnection pursuant to WAC 480-110-355 (3)(a). If a copy of the annual report is not received by the date for disconnection as specified in the notice, the Utility will disconnect customer's service.
7. No less often than every three years, the Utility shall re-survey its customers concerning the existence of cross connections. If the customer does not respond to the initial survey, a second survey will be sent. If the customer does not respond to the second survey, then non-response options listed in paragraph 2 will apply.
8. For each customer meeting any criteria of WAC 246-290-490 (4)(b) Table 9, no less than every three years, the Utility shall conduct a site visit, premises inspection and shall assess the customer the charges set forth in the rate section above.
9. When necessary, the Utility will provide notices of disconnection as required in WAC 480-110-355 (3) (a).
10. If service is disconnected, the Utility will charge the customer its current Reconnection Visit Charge as described in **Rule 6** of this tariff.
11. The Utility may immediately shut off water service if a public health emergency exists, including when a backflow is occurring, or an unprotected cross-connection with sewage or an unapproved water source exists.
